- Node.js, React, Express
- C#, .NET
- SQL, MongoDB
- Java, Python, C
- Design Patterns
- Effective Communication
- Quick Problem Solving

EDUCATION

2022 - until now

TEL HAI ACADEMIC COLLEGE

- BSc. in Computer Science
- GPA: 84/100

LANGUAGES

- English (Fluent)
- Hebrew (Fluent)
- German (Basics)
- Russian (Native)
- Ukrainian (Native)

Motivated computer science student, passionate about coding. Seeking a Fullstack Developer or Software Engineer job.

I'm able to learn quickly due to my natural logical thinking and have some serious self-developed projects that demonstrate my strong understanding of programming.

EXPERIENCE

- **Bugs Repository Project** 2025
 - Developed an app for reporting bugs using C# for logic and SQL for database.
 - Implemented Singleton and Abstract Factory design patterns for efficient architecture.
 - Designed a user-friendly interface that displays bugs and their categories in a tree structure.
- **Gemini API Project** 2025
 - Created a chatbot similar to ChatGPT using EJS, CSS and JavaScript.
 - Integrated Gemini API and created a modern design.
 - Implemented MongoDB to store and preserve conversation history for each user.
- **Private Tutor at Tel Hai College** 2024
 - Prepared the lessons and educated college students in Discrete Math and Python. This enhanced their general understanding and resulted in higher grades, such as 88 on Discrete Math exam.
- **Movies Website Project** 2024
 - Created a website that is able to search for movies, add them to favorites, display their details and perform CRUD operations with links for each of the users.
 - Gained deeper knowledge of front-end development while creating it.
